

These are 1/9 intervals for slicing the 6" square dough into 9 long strips.

These are Quarter Inch Intervals (1/4") for slicing the final cookies to place on the baking sheet.

These templates are designed to help cut the dough for the strips and for individual cookies.

Just fold the paper along the edge of each set of intervals and lay it against the dough to mark the cuts.

Be sure to print out this PDF at "full scale" versus "scale to fit". Otherwise the measurements won't be accurate.

To confirm the size make sure your printout measures 6" as shown above.
